

Surface K type thermocouple probe 90°

Right Angle with Long Stainless Rod.

Product Introduction

TPK-04L is suitable for the surface temperature of iron plates and flat objects.

TPK-04L

Product Information

Measurement Specification

Measuring Range: -50 to 500°C (-58 to 932°F)

Sensor Diameter: Ø9.5mm

Type of Thermocouple: Type-K

Sensor Material: **304** Stainless steel (SUS304)

Industry Standard Connector :

Working Environment: -50 to 500°C

Storage Environment: -50 to 50°C

Exterior : Sensor Length 165mm, Handle length 120mm
